THE CLEVER TRADER

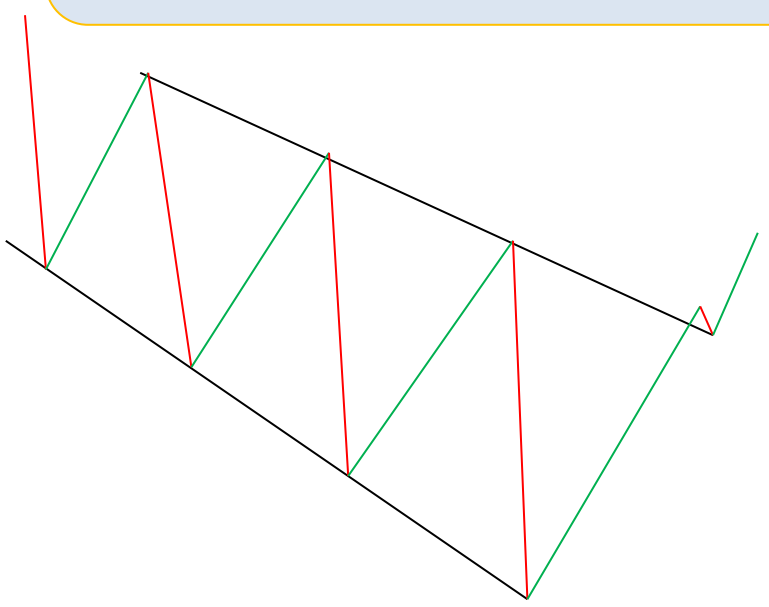

Descending Brodening wedge

Descending broadening wedge is a

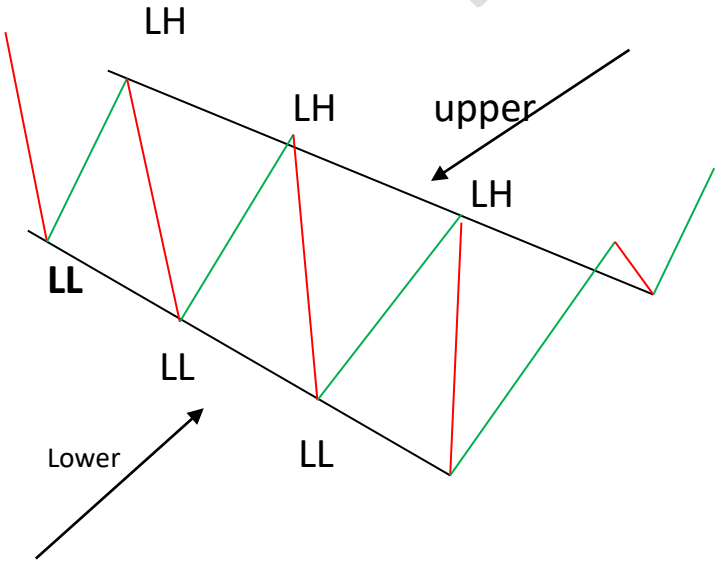

Dullish trend reversal chart pattern that

Consists of an expanding ware in the downward trend

How TO IDENTIFY DESCENDING BAOADENING WEDGE PATTERN

1. Find where the price starts going down (the starting point).
2. Check if each new fall in price goes lower than the previous one
3. Each fall should be bigger than the one before.
4. Draw lines connecting the highest point and the lowest point of each fall.
5. The starting point of the wedge should be thin and the ending point thick.
6. Make sure there are at least three falls in the wedge pattern.
